Minor changes included

From production marathon to controlled flow.

A short message can take a surprisingly long route to the screen. AI Avatar production keeps the creative judgement and human review, while removing the physical shoot and its repeated on-camera takes.

BEFORE · TRADITIONAL PRODUCTION

Studio booking, crew, lighting and sound, wardrobe and setup.
Rehearsal, memorising or teleprompter practice.
Camera pressure and multiple takes - the familiar on-camera NG moments.
Editing, captions, factual checks, approval, publishing and costly late corrections.

Time cost: every meaningful change can mean another round of filming.

NOW · AI AVATAR PRODUCTION

Approve the script once and agree tone and brand once.
No studio, crew, rehearsal or physical reshoot required.
Keep delivery, background and captions consistent.
Change a line without arranging another shoot.
Finish with human QA for names, dates, subtitles and brand before publish.

Result: no physical reshoot or on-camera NG - one controlled production flow. Technical AI renders may still be used when needed.

THE SHIFT

From: coordination, rehearsal, retakes and post-production queues

To: one approved brief, one consistent production flow, human QA and a publish-ready MP4

Start with one. Save as you scale.

What is included

- Approved script and content structure
- English subtitles and 1080p MP4 delivery
- One minor revision after the first delivery
- Professional avatar, voice and branded background
- Scene assembly for a clear, paced presentation
- Final review for names, dates and on-screen text

Projects longer than 10 minutes may be produced in approved sections and assembled into one final video. Final timing follows the approved script, format and visual plan.

DISCUSS A DURATION

What we need from you

A complete, approved brief keeps production fast and prevents avoidable regeneration costs.

01 Final approved script

Correct names, titles, dates and pronunciation notes.

02 Audience and tone

Who will watch, and whether delivery should be formal, warm or energetic.

03 Brand assets

Logo, brand colours, preferred background and mandatory visual elements.

04 Avatar, voice and format

Language, voice, framing and 16:9, 9:16 or 1:1 output.

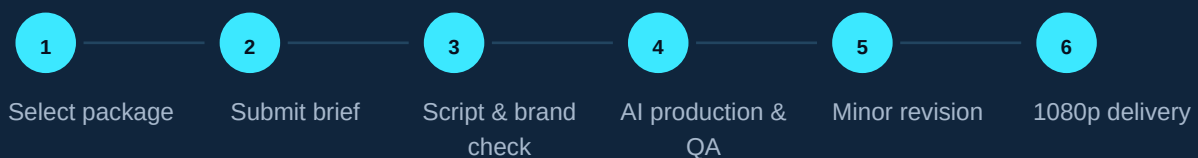

05 Rights and consent

You must own supplied assets and provide written consent for custom likeness or voice.

06 Deadline and feedback

Confirm delivery timing and consolidate revision notes in one clear list.

Production flow

Important: Unauthorized likeness or voice cloning is not accepted. Major script or visual changes after generation are treated as a new regeneration and quoted separately.
